

Auxilium Business Consulting Ltd

Artificial Intelligence Statement.

March 2025.

This statement outlines how, when, and why Auxilium Business Consulting Ltd utilises artificial intelligence (AI) technologies in our business operations.

How We Use AI

Auxilium Business Consulting Ltd employs AI tools for:

- Content creation and editing
- Data analysis and reporting
- Administrative task automation
- Research assistance
- Client communications support
- Document summarisation and review

When AI Is Used

AI is utilised:

- To enhance efficiency on routine tasks
- For preliminary data analysis, with human review
- When processing large volumes of information
- As a drafting tool for initial content creation
- For administrative support functions

Why We Use AI

Auxilium Business Consulting Ltd employs AI to:

- Improve service delivery speed and quality
- Enhance data analysis capabilities
- Reduce administrative overhead

- Maintain competitive service offerings
- Focus human expertise on high-value activities

What applications we use in AI

- Chat Gpt
- Co-Pilot
- Claude
- Perplexity
- Canva

Governance and Oversight

- All AI-generated content undergoes human review before client delivery
- Client data used with AI systems is handled in accordance with our privacy policy
- Regular evaluation of AI tools ensures alignment with quality standards
- Staff are trained on appropriate AI usage and limitations

Transparency

- Clients will be informed when AI has been used in substantive deliverables
- We maintain accountability for all advice and work product regardless of AI involvement
- Questions about our AI usage can be directed to Alex Hughes

Review

This policy is reviewed and updated annually or sooner if required to ensure it remains current with technological developments and business practices.

Date: 31st March 2025.

Signed 

Alex Hughes – Director & Owner of Auxilium Business Consulting Ltd
